STEEL SPACE FRAME STRUCTURE CANOPY FOR MAIN GATE, CHECK POINT & TOLL STATION GATE

The Steel Space Frame Structure Canopy is a modern and highly durable roofing solution designed for large-span coverage with minimal support columns. Ideal for applications such as Substations, Gas plants, airports, sports arenas, industrial facilities, and gas stations, this canopy offers both structural integrity and aesthetic appeal.

Main Features

- Lightweight but high-strength structure
- Minimal maintenance over time
- Faster installation due to prefabrication
- Cost-effective for large span coverage
- Customizable design to match architectural aesthetics

INDUSTRIAL FACILITY GATES – HCIS COMPLIANT

Our Industrial Facility Gates are designed to provide maximum security, durability, and ease of access for large-scale industrial operations. Engineered with robust materials and advanced mechanisms, these gates are ideal for:

Substations | Oil & Gas Plants | Factories | Warehouses | Logistic centers

Genesis Arabia offering

- Sliding Gates
- Swing Gates
- Emergency Gates
- Telecom Shelter Gates
- Chain Link Gates

HCIS COMPLIANT - FENCE

HCIS (High Commission for Industrial Security) Fences are specifically engineered to meet the strict security standards mandated by Saudi Arabia's HCIS guidelines. Designed for critical infrastructure facilities, energy sectors, and high-risk industrial sites, these fences offer maximum protection against unauthorized access, forced entry, and external threats.

Key Features:

- HCIS Compliance.
- High-Grade Materials.
- Anti-Climb Design.
- Heavy Foundations.
- Modular Construction.
- Enhanced Security Options.
- Integration-ready with (IDS), CCTV, fiber optic sensors, and anti-ram vehicle barriers.

FULL-HEIGHT TURNSTILE — HCIS COMPLIANT

Our HCIS-compliant Full-Height Turnstile is engineered for maximum security, ensuring controlled access for critical infrastructure facilities. Designed to meet (HCIS) standards, this turnstile provides robust perimeter protection and strict personnel access control while supporting seamless integration with access management systems.

Key Features:

- HCIS Compliant
- Access Control Integration
- Anti-Tailgating and Anti-Passback
- Bidirectional Operation
- Fail-Safe or Fail-Lock Options
- Emergency Override
- Weatherproof and IP-Rated
- LED Indicators

ARM BARRIERS

GENSIS ARABIA Arm Barriers provide a reliable and efficient solution for controlling vehicle access in a wide range of environments, from residential complexes to high-security facilities.

Key Features:

- **Durable Construction:** Built with heavy-duty materials to withstand harsh weather and intensive use.
- **High-Speed Operation:** Fast opening and closing cycles for seamless traffic flow.
- **Safety Mechanisms:** Integrated safety sensors and emergency release options ensure maximum safety for vehicles and pedestrians.
- **Customizable Options:** Available in a variety of boom lengths, lighting options, and security integrations (such as RFID, ANPR, and remote control).
- **Smart Integration:** Compatible with access control systems, ticketing systems, and building management platforms.

TIRE KILLERS

GENESIS ARABIA Tire Killers offer uncompromising vehicle control, ensuring only authorized access while effectively disabling unauthorized vehicles attempting forced entry.

Key Features:

- **High Security:** Engineered to instantly immobilize vehicles by destroying tires upon unauthorized access attempts.
- **Heavy-Duty Construction:** Manufactured using high-strength steel capable of handling heavy-duty vehicular loads.
- **Surface-Mounted or Flush-Fit:** Available in both above-ground and in-ground models.
- **Manual and Automatic Options:** Operated manually, hydraulically, or electromechanically.
- **Fail-Safe Design:** Optional integration with access control.

Applications: High-Security Entrances, Border Control Points Military Bases, Critical Infrastructure Facilities, Warehouses and Logistics Hubs.

CCTV MONITORING CONSOLES

Enhance surveillance efficiency with our state-of-the-art CCTV Monitoring Consoles, designed to provide operators with a comfortable, organized, and high-functionality workspace for critical security operations.

Key Features:

- **Ergonomic Design:** Optimized layouts that reduce operator fatigue, featuring adjustable monitor mounts, cable management systems, and ample work surface space.
- **Integrated Technology:** Supports multiple displays, control panels, and peripheral devices, with seamless integration for CCTV software, video walls, and network systems.
- **Security and Comfort:** Optional features like lockable drawers, equipment racks, task lighting, and cooling vents enhance both security and operator comfort.
- **Aesthetic Appeal:** Sleek, modern designs available in various finishes and colors to complement any control room or facility decor.

Applications: Security Control Rooms, Traffic Management Centers, Airports and Seaports, Police and Emergency Response Centers, Corporate and Commercial Surveillance Hubs & Critical Infrastructure Facilities.

CCTV CAMERA AND LIGHTING POLES

Genesis Arabia Poles are designed to provide maximum stability, security, and longevity for surveillance cameras, security lights, and other mounted equipment across diverse environments.

Key Features:

- **High-Strength Construction:** Manufactured from galvanized steel, aluminum, or other corrosion-resistant materials to withstand extreme weather conditions and environmental stress.
- **Customizable Heights and Designs:** Available in various heights, diameters, and configurations to meet specific project requirements.
- **Integrated Cable Management:** Internal wiring channels ensure a neat appearance and protect cables from vandalism, tampering, and environmental damage.
- **Mounting Flexibility:** Designed to support multiple devices, including PTZ cameras, fixed cameras and Security lights.
- **Finish Options:** Hot-dip galvanized, powder-coated, or painted finishes in a variety of colors to suit architectural and environmental aesthetics.

PARKING MANAGEMENT SYSTEM

Genesis Arabia Streamline parking operations with our intelligent and fully integrated Parking Management System. Designed to optimize space utilization, enhance security, and improve user convenience, our solution is ideal for commercial, residential, and institutional facilities.

Key Features:

- **Automated Entry & Exit Control:** Seamless access using RFID, license plate recognition (ANPR), QR code scanners, or smart cards, reducing wait times and manual intervention.
- **Real-Time Space Monitoring:** Live tracking of available spaces with LED guidance and digital display boards to direct drivers efficiently.
- **Centralized Management Dashboard:** Intuitive software interface to monitor, manage, and generate reports on parking activity, occupancy, and revenue in real time.
- **Enhanced Security Integration:** Works in sync with CCTV systems, boom barriers, tire killers, and alarm systems for complete vehicle access control.

Applications: Malls & Commercial Complexes, Residential Communities, Hospitals & Universities, Airports & Transit Hubs, Hotels & Event Venues & Government & Corporate Campuses.

PARKING SHADES SYSTEM

Protect vehicles and enhance aesthetics with our high-quality Parking Shades Systems. Designed to provide reliable protection against harsh weather while improving the visual appeal of your premises.

Key Features:

- **Durable Construction:** Manufactured using high-grade steel structures with premium fabric or PVC covers, resistance to UV rays, rain, and dust.
- **Variety of Designs:** Available in multiple configurations including cantilever, pyramid, arch, sail, and wave designs to suit and space requirements.
- **High UV Protection:** Fabric options offer up to 95% UV blockage, helping to maintain vehicle condition by protecting paint, interiors, and tires.
- **Corrosion-Resistant Finishes:** Structures are treated with anti-corrosion coatings and powder-painted.
- **Customizable Sizes and Colors:** Tailored solutions to fit any parking layout, with a wide range of color options to match corporate or aesthetic themes.
- **Wind and Weather Resistance:** Engineered to withstand strong winds and adverse weather conditions, following local safety standards and regulations.
